## My Major & Career Goals

I am currently a business finance major at UNR. My career goals after college is to work at the bank and get my series seven and kind of go from there. I would like to be a financial advisor or something similar to that. I am kind of going with the flow and taking whatever opportunity presents itself.

## My Technical Background

I would say that I am proficient with technology. Some software I use a good bit are Microsoft Word and Excel in all my college classes. I know how to apply functions in excel and use them for real world purposes. I also am pretty good at using AI like grok.

## Hobbies & Non-Technical Skills

I like doing a bunch of things. I love snowboarding, wake surfing, golfing, fishing, boating and more but those are probably things I do the most. I used to play football from 3<sup>rd</sup> grade to 2 years of Juco, and I still love watching the sport today. I also wrestled and played a year of rugby. I love music and would often listen rap before I would go out and play. My favorite rapper is Lil Wayne.
